## FISCAL ANALYSIS

### ASSUMPTION

**Oversight** notes this proposal would add air ambulance pilots, nurses and respiratory therapists as well as emergency medical technicians and uniformed employees of the State Fire Marshall to the definition of Public Safety Officer for the Public Safety Officer and Employee's Child Survivor Grant Program. This would allow family members of these people to receive the Survivor grant. The Survivor Grant Program provides educational grants to the children or spouses of certain public employees killed or permanently and totally disabled in the line of duty. The current average award is \$4,867. This proposal also allows for the disbursement of any unpaid workers compensation into his or her estate.

Officials at the **Department of Higher Education (DHE)** assume that in the last fifteen years there have been 11 emergency medical technicians and four air ambulance personnel killed in the line of duty. Based on this data and the current distribution of recipients, DHE estimates this change will result in the payment of three additional individuals during the period of the fiscal impact statement. The FY 2015 average award under this program was \$4,867. Inflating that number at three percent per year, the average award for FY 2017 would be \$5,163. The total needed to pay three additional recipients would be \$15,489. Those numbers are inflated by three percent for FY 2018 and FY 2019.

Officials at the **Department of Public Safety's Division of Fire Safety** assume this would not fiscally impact the Division. However, the uniformed staff of the Division would be impacted as they would be eligible for these benefits. There are currently 56 uniformed employees.

Officials at the **Department of Labor and Industrial Relations** assume there is no fiscal impact from this proposal. This language broadens the class of individuals entitled to Line of Duty benefits to include a uniformed employee of the office of the state Fire Marshal. Emergency medical technicians are already included in the Line of Duty Act. It is assumed any increase in the number of Line of Duty claims, due to the inclusion of the state Fire Marshal, could be covered with existing appropriation authority. The remainder of the changes to the Line of Duty payments clarify the individuals who can file claims, but do not appear to add additional classes of individuals to the Line of Duty Act.

FISCAL IMPACT - Small Business

No direct fiscal impact to small businesses would be expected as a result of this proposal.

FISCAL DESCRIPTION

This bill adds several professions, including air ambulance pilots, air ambulance registered professional nurses, air ambulance registered respiratory therapists, uniformed employees of the Office of the State Fire Marshal, and their children and spouses, and specified emergency medical technicians and their children and spouses to the list of those eligible to receive a public safety officer or employee survivor grant from the Coordinating Board for Higher Education within the Department of Higher Education.

This bill also adds a uniformed employee of the Office of the State Fire Marshal and his or her child and spouse, and specified emergency medical technicians and their children and spouses to the list of those eligible to receive unpaid workers' compensation claims when the employee is killed in the line of duty.

This legislation is not federally mandated, would not duplicate any other program and would not require additional capital improvements or rental space.
