FISCAL ANALYSIS

ASSUMPTION

Officials of the **Office of Administration (COA)** state they have no data that would indicate what percent of total sales are for items costing under \$100, nor do they have any basis for estimating how effective the program would be in so far as causing sales to take place during the week of the sales tax exemption. They estimated the annual consumer spending in Missouri on clothing and shoes based on U.S. Personal Consumption Expenditures for Clothing and Shoes. COA staff assumes Missouri represents 1.9% of U.S. totals. COA staff estimate taxable sales for FY2001 to be \$6,154,000,000.

The revenue estimate used is based on 1/52 of the FY2001 taxable sales resulting in a loss of \$5,000,126 million due to the sales tax holiday. No adjustment was made for the \$100 cap. No adjustment was made for any incentive effect this proposal might have on spending habits.

Officials of the **Department of Revenue (DOR)** state this legislation would provide a period between August 12, 2000 and August 20, 2000 and exempts sales tax due on clothing have a "taxable value" of one hundred dollars or less during this period.

ADMINISTRATIVE IMPACT: The Department of Revenue would need to notify all businesses about this law change to insure it is implemented correctly. This mailing to approximately 127,000 accounts would cost .33 each, including the notification brochure, or \$41,910. The Division of Taxation would also require programming changes in the MITS system to eliminate sending billings to those who report sales but do not collect sales tax. This would be accomplished with 173 overtime programming hours at approximately \$25.57 per hour or \$4,424. The State Data Center would also charge \$1,126 for implementation and testing.

REVENUE IMPACT: clothing sales in just Apparel and Accessory stores alone can average \$120,000,000 per month during the August time frame. Given the nature of this proposal - 1 week exemption and a \$100 limit, DOR staff are not able to estimate the revenue impact.

Oversight, in a previous proposal had based the fiscal impact on the Standard Industry Code (SIC) code-56; however, **Oversight** is compelled to rely on the data from other sources because SIC code-56 did not include some retail establishments which sold clothing and other items, such as discount stores and department stores. **Oversight**, for purposes of this fiscal note, has reflected the loss in sales tax revenue of \$5,000,126 based upon the estimate provided by the Office of Administration and the actual impact similar legislation had on other states.

ASSUMPTIONS (continued)

Oversight contacted three states that enacted similar legislation, the **State of Texas**, the **State of Florida** and the **State of New York**. Texas had a Sales Tax Holiday on clothing and footwear during a three day period in August, 1999. Florida had a nine day sales tax holiday period on clothing and footwear in August, 1998, and New York has had several such “holidays” in 1997, 1998 and 1999. Oversight assumes that similar impacts would occur in Missouri and have applied their taxable sales during the holidays to the Gross State Product in Chained (1992) Dollars, by industry from the U.S. Census Bureau, *the Official Statistics, Statistical Abstract of the United States: 1998* to determine what Missouri’s taxable sales in a similar period might be. The comparison reveals that Missouri could expect to incur a loss in sales tax revenue in a range between \$4.64 million and \$5.46 million for a sales tax holiday for seven days on clothing and footwear below \$100. Oversight assumes that the same impact will occur whether the exemption applied to clothing or shoes under \$500 as it would for clothing under \$100. Oversight also assumes that the same results would occur on a three day exemption as it would for a seven day exemption, however, a nine day exemption would occur over two weekends, and would therefore, need to be adjusted down. The estimate from the Office of Administration falls within this range, further reinforcing our estimate.

This proposal would result in a decrease in Total State Revenues.

FISCAL IMPACT - Small Business

Small businesses who sell clothing would be expected to be fiscally impacted to the extent that they would no longer collect and pay sales tax on these taxable items. Small businesses who would purchase clothing would pay less for such items.

DESCRIPTION

This proposal exempts from state and local sales and use tax the sale of certain clothing when sold between the hours of 12:01 a.m., August 12, 2000, and midnight, August 20, 2000. Each individual item must sell for \$100 or less to qualify for the exemption.

This proposal contains an emergency clause.

This legislation is not federally mandated, would not duplicate any other program and would not require additional capital improvements or rental space.
